

SOFTWARE ENGINEER

JOB DESCRIPTION

MobilityOne runs a number of e-services for electronic payment, prepaid reload, bill payment and remittance services. These services are integrated to multiple Banks, Telcos, SMEs and Service Providers to provide end Customers with a convenient mechanism for effecting electronic payment, purchase and remittance transactions.

You will be part of a team involved in supporting, customizing, integrating MobilityOne's systems. The successful candidate will be exposed to a real-world environment that will promote the development of a variety of skills including application development, system integration, communications, pre-sales (development of commercial proposals, technical presentations, tenders, etc) & post-sales support. The experience from this posting will place the candidate in good stead for any number of future careers.

RESPONSIBILITIES

- a. Application development & customization

REQUIREMENTS

- a. Candidate must possess at least a Bachelor's Degree, Post Graduate Diploma or Professional Degree in Engineering (Computer/Telecommunication), Computer Science/Information Technology or equivalent.
- b. People-oriented, outgoing personality, passionate about being involved in real-world IT implementations
- c. Possess good interpersonal, communication and documentation skills.
- d. Technical skills in C/C++, .NET applications, web-based applications, commercial RDBMS products (MS SQL Server)
- e. Able to work independently or in a team
- f. Willingness to travel
- g. Fresh graduates are welcome to apply. In-house training and mentorship will be provided.
- h. Relevant experience in the payment & banking industry is an added advantage
